

obj cont
37. (New) The tray insert of claim 36, wherein said coupling member includes a protrusion having an inclined surface, said coupling member adapted to mechanically engage the recess.

all cont
38. (New) The tray insert of claim 37, wherein said coupling member is disposed on said second surface.

39. (New) The tray insert of claim 36, wherein said body portion includes an extending portion configured to conform to and engage a portion of the support rim.

40. (New) The tray insert of claim 39, wherein said extending portion has a U-shaped configuration.

41. (New) A tray set comprising:

a support having a cavity formed therein, said cavity being defined by a rim and a support surface within said rim, said rim further defining a perimeter of said support and having a first configuration; and

a liner disposable within said cavity and contacting substantially all of said support surface, said liner having an outer portion releasably engagable with said rim of said support, said outer portion having a second configuration, said first configuration being substantially the same as said second configuration.

42. (New) The tray set of claim 41, wherein said liner includes a body portion and a coupler disposed on said body portion, said coupler positively engaging said support such that said liner is releasably engageable with said support.

43. (New) The tray set of claim 42, wherein said support includes a recess formed in said rim, said coupler engaging said recess and coupling said liner to said support.

AM/COP

44. (New) The tray set of claim 42, wherein said rim includes an inner surface and an outer surface, said support includes a recess formed in said outer surface, said liner includes an upper surface and a lower surface, said coupler disposed on said lower surface, said coupler engaging said recess and coupling said liner to said support.

45. (New) The tray set of claim 41, wherein said support includes a coupler disposed on said rim, said coupler positively engaging said liner such that said liner is releasably engageable with said support.

46. (New) The tray set of claim 45, wherein said rim includes an inner surface and an outer surface, said coupler being disposed on said inner surface, said liner includes an upper surface, a lower surface, and a recess formed in said lower surface, said coupler engaging said recess to couple said liner and said support together.

47. (New) The tray set of claim 41, wherein said support includes a plurality of recesses formed in said rim, said plurality of recesses extending below an upper surface of said liner.

48. (New) A tray kit comprising:

a first tray having a body portion and a perimeter portion extending around said body portion, said body portion having a plurality of pockets formed therein, said perimeter portion including a latch disposed on a lower surface thereof; and

a second tray, said second tray having an upper surface with a cavity formed therein and defined by a rim extending around said cavity, said rim including a recess formed therein, said latch of said first tray being selectively coupleable with said recess to retain said first tray in said cavity.

REMARKS

Entry and consideration of the foregoing amendments is respectfully requested.
